DYNAUDIO SPEAKER KITS		Price / Pair
MDY-4 Kit The MDY-4 kit is a 1/2 cubic foot aperiodically loaded 2-way system. This kit uses the 17W75ext woofer and the D-28/2 tweeter in a sloped front cabinet. The crossover has been computer optimized for a smooth response and flat phase response, producing a speaker with exceptional clarity and imaging. The cabinets are oak veneered particle board with solid oak corners, black grill and come in either a clear finish or black stained finish.		\$650 \$450 w/o cabinets
Aries Kit The Aries is a floor standing aperiodically loaded 2-way system. This kit features the new Esotec speakers, 20W75 8" woofer and D260 tweeter in a 40" tall cabinet with a 9" x 10" footprint. This kit uses a 6dB crossover with phase compensation. The system is 4 ohms with an efficiency of 89dB. Cabinets are available in a clear Oak finish or black stained Oak finish with a black grill extending 2/3 cabinet length.		\$1024 \$624 w/o cabinets
Twynn Kit The Twynn kit is an MTM design using two 6.5" woofers in an aperiodically loaded floor standing cabinet. The Twynn uses two 17W75 woofers with a D-28/2 tweeter in the middle. The cabinet is 44" tall with a 10" x 12" footprint. The system impedance is 4 ohms with an efficiency of 90dB. The Twynn is available with either the Dynaudio designed 6dB filter or the Madisound Leap designed 18dB filter. Cabinets are available in a clear Oak finish or black stained Oak finish with a 2/3 black grill. MTM designs provide a large sound stage with good imaging.		\$1060 Dyn. x-over \$1080 Leap x-over
Gemini Kit The Gemini kit is an MTM design using the new Esotec drivers in a 1/2 cubic foot vented design. The cabinet is 18 1/2" tall, 7 3/4" wide and 11" deep and contains two Esotec 15W75 woofers and a Esotec D260 tweeter mounted in between. This Gemini has a huge sound stage for a speaker of this size, providing deep and accurate bass to 50Hz. The impedance is 4 ohms and the efficiency is 91dB. The crossovers are 6dB with phase compensation. Cabinets are available in a clear Oak finish or black stained Oak finish with a black grill. You can't buy a speaker of this quality for under \$2,500.		\$1060 \$807 w/o cabinets
Xennon 3/100 Kit The Xennon kit is a floor standing 3-way design in a 39" tall x 15" wide x 12" deep ported cabinet. The woofer is the 10" 24W100 with a 4" voice coil, the midrange is the 3" dome D-76 with a 3" voice coil, and the tweeter is the 1" dome D-28/2. Speaker efficiency is 90dB with an 8 ohm impedance and bass output to 28Hz. The crossover design is 6dB with compensating filters. Cabinets are available in a clear Oak finish or black stained Oak finish with a black grill. This speaker is very detailed, yet unobtrusive. The large motors on the woofer and midrange provide extreme accuracy for any transient.		\$1370 \$930 w/o cabinets
Myrage Kit The Myrage kit is a 3-way MTM design in a tower cabinet. The Myrage uses two 24W100 woofers, two D-76 midranges and the Esotar hand crafted tweeter. This is a no compromising design using premium Dynaudio components. The Myrage efficiency is 93dB into a 4 ohm impedance, and has bass extension below 30Hz. We currently don't have cabinets made for this system, but we offer plans for cabinet construction. This is the flagship speaker of the Dynaudio Kit line, providing fast and articulate bass reproduction and the mids and highs of an electrostatic speaker.		\$1985 cabinets not available
Finale Kit The Finale kit is a 4-way system in a tower cabinet. The Finale uses the 30W100XL 4ohm woofer with a matching passive radiator for the bass end. The midrange is covered by a 15W75 4 ohm and D-52AF, blended together so that the sound seems to emanate from a single source. The high frequencies are reproduced by the Esotec D260 tweeter. This tweeters design eliminates any back wave from the tweeter dome, producing the airiness and musicality of an electrostatic speaker. We can't ship these cabinets by UPS, but we will search for several shipping quotes for you.		\$1775 cabinets not available
Focus Kit The Focus kit is a bookshelf style 2-way system. The cabinet is 14.75" tall x 7.5" wide x 9.5" deep (cabinets not included). The woofer is the 6.5" 17W75XL 4 ohm and the tweeter is the D-28/2 1" textile dome. The speaker is designed to boost the bass output in the low end, or the port can be stuffed with fiberfil to reduce bass output. Customer response from this small bookshelf speaker has been very good.		\$490 w/o cabinets

All the Dynaudio kits are supplied with every thing needed to finish the speaker kit. The speaker builder will need a soldering gun, screwdriver and drill. The crossovers are assembled using components as specified by Dynaudio. The only other upgrade to these kits might be the use of better internal wiring and perhaps experimentation with the Deflex panels. We have some customers who have tried the Deflex panels in these kits with promising results. Our staff is experienced with all Dynaudio products and kits and we welcome your questions.
